## A Symphony of Glass and Cedar

Perched on a secluded ridge in the heart of the Catskill Mountains, The Forest Retreat is a masterwork of contemporary organic architecture. Designed to dissolve the boundaries between shelter and nature, this property features soaring glass elevations that frame the changing seasons like living gallery pieces.

The interior is a study in quiet luxury, utilizing hand-charred cedar, locally sourced bluestone, and tactile linens to create an atmosphere of profound tranquility. Whether watching the morning mist roll through the valley or gathering around the central hearth, every moment here is curated for reconnection.
